

Oregon Tradeswomen, Inc. Offices

2010 | 2014 Portland, Oregon

This is a Tenant Improvement project for the new offices for Oregon Tradeswomen, Inc.; a non-profit that trains and advocates for women in the trades. The selected office space location is along the pedestrian streetfront of a major commercial and transit corridor in NE Portland.

The existing building allowed for an increase in employee workspaces at both the ADA accessible ground level and at a proposed mezzanine, including a generous entry and job resource area, as well meeting, counseling, and other staff areas. The design goals of the project are to allow natural light deep into the spaces, to create a sense of connectedness, visibility and openness throughout the office while allowing for acoustic and privacy separation when needed.

Building Type: Office
Project Type: Tenant Improvement
Project Scope: Full contract
Client: Oregon Tradeswomen, Inc.
Size: 2340 SF
Schedule: Phase I 2010 | Phase II 2014
Structural Engineer: Tesner Structural Engineering
Lighting Design: LOOP Lighting
General Contractor: Oregon Tradeswomen, Inc.

Oregon Tradeswomen, Inc. Offices

2010 | 2014 Portland, Oregon

Oregon Tradeswomen works with volunteer and donated support from skilled tradespeople, current students, and vendors, to minimize both project labor and material costs. This resource lead to a focus on simple and direct design detailing to accommodate a wide range of skill levels. Finishes were also selected for a healthy working environment.
