

Made In Oregon Store

2010 Portland, Oregon

SITE & PROGRAM

This branch of a retail chain store specializing in Oregon products is located in Concourse D of the Portland International Airport, en route to the international gates. The project called for an interior designed to support a changing display of items, along with some fixed areas to display specialty goods — Oregon wines in particular — and regional foods such as preserved fruits, hazelnuts, and smoked fish.

Designer: Constructive Form in collaboration with John Cava Architect

Building Type: Retail Store

Project Type: Tenant Improvement

Project Scope: Full contract

Client: Made In Oregon

Size: 660 SF

Schedule: Completed 2010

Lighting Consultant: LOOP Lighting

General Contractor: Western Construction

Made In Oregon Store

2010 Portland, Oregon

Constructive Form LLC was brought in by the lead architect, John Cava Architect, to collaborate on the design, coordinate with mechanical/electrical/plumbing and lighting consultants, assist with the Port of Portland process for design review, and help with construction administration. Layout, color, finishes, millwork design, and detailing were worked on within a tight budget and a condensed timeframe for the contractor to complete the construction.
